

# Priority ERP Cloud Platform

**Gain access to business-critical applications at any time, from any location**

Powered by AWS, the Priority Cloud business management platform is based on a customizable, flexible architecture that uses standard web-based technologies to create a business logic that can be modified using the platform tools or separate integrated development environments.

Priority's open, scalable, and highly secure full SaaS cloud platform drives efficient work practices, increases interoperability, saves time, and reduces the total cost of ownership, helping organizations to change the way they work.

From enhanced system visibility and accessibility companywide, to accelerated business processes, improved productivity, and optimized resource management across the board, Priority Cloud provides robust system functionality, and up-to-date software versions and modules, all while delivering a comprehensive business management solution.

## 360° Management of Your Business Operations

- High-level performance, stability and scalability
- Enhanced security and data encryption
- Optimal multi-zone service management
- Continuous, automatic software updates
- Proactive management via system alerts
- Advanced Cloud File integration mechanism

### Always Ahead

Benefit from the most up-to-date software versions and updates

### Agile & Mobile

Easy access from anywhere, anytime, via any mobile device or tablet

### Reduced Costs

On system implementation, maintenance, and upgrades

### Fast & Easy Implementation

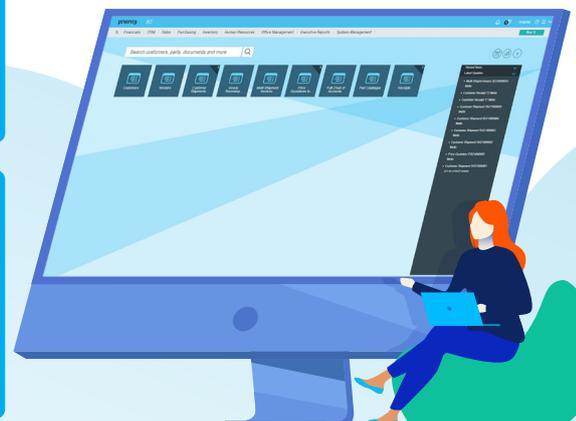

Get your business up and running in no time

### Highest Level Security

No more worrying about hackers, breaches or attacks

### Customer Support

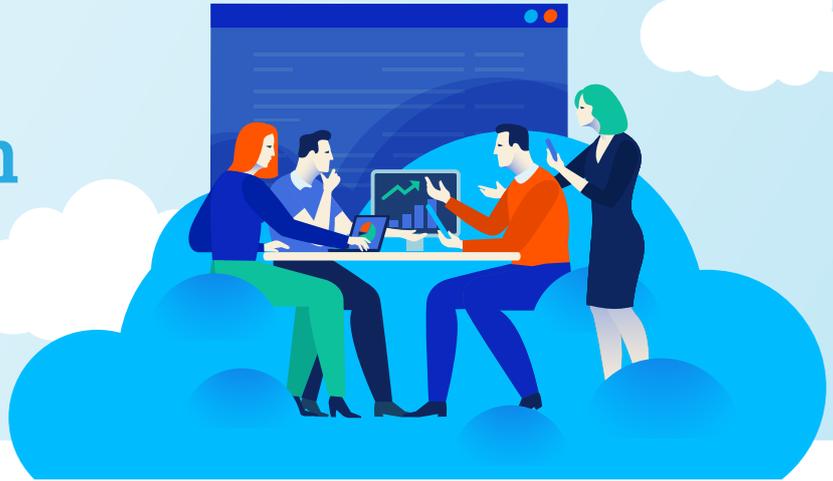

Professional and responsive customer support & service

**priority**<sup>™</sup>

# Priority ERP Cloud Platform

## Benefits

### User experience & UI

A super intuitive, friendly and easy user interface. Enables fast system adoption and onboarding for new users.

### Increased performance

Benefit from real-time access to your data across multiple platforms to save valuable time and resources, and enhance efficiency and productivity throughout your organization.

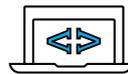

### Accessibility

Access your business management system, from desktops to mobile devices, at any time, and enjoy multiple user access to Priority, without the need for local installations. Avoid endpoint challenges, such as network connection, plugin installations, and more.

### Enhanced security

Enjoy the highest levels of security, reliability and scalability, where all data is encrypted using industry-standard ciphers, securely stored in regional data centers, and mirrored to a backup site, with point-in-time backups available. Stringent security requirements include SOC 1/SSAE 16/ISAE 3402 (formerly SAS 70 Type II), SOC 2, FISMA, DIACAP and FedRAMP, PCI DSS Level 1, ITAR, and FIPS 140-2.

### Development environment

Dedicated workspace for software/web developers to easily create and configure data sets and processes, from dynamically defining field values to creating reports, and using convenient app generators, without requiring programming skills.

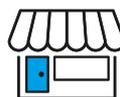

### Administrator tools

Comprehensive system admin tools to enable streamlined user management, define user roles and permission levels, and various design tools to leverage additional system capabilities.

### Integration tools

Easily integrate Priority with third-party solutions using the REST API, generate customized mobile and web apps or embed external components with the Web SDK, and facilitate file-based integration using Cloud File Sync.

### Priority Market

Explore Priority's marketplace to discover a wide range of cross-industry third-party solutions, connectors, and applications provided by authorized Priority Technology Partners.
